  Registration number: L-119904/2022

- Titled: PUNCTURE DETECTION FOR TWO-WHEELER ELECTRONIC VEHICLE.

  Registration number: L-132795/2023

- Titled: LPG GAS INDICATOR AND SAFTY DEVICE.

  Registration number: : L-132694/2023

PROJECTS

- ## Quora-Style Login Page Replica
  Short summary of your work

  Developed a dynamic login page mirroring Quora's design using HTML and CSS. Implemented responsive design for diverse screen sizes and client-side validation for optimal user experience. Achieved password security through masked input and optional social media integration. Strengthened front-end development skills and created a portfolio-worthy project.

- LANDING PAGE

  Short summary of your work

  Designed and developed a visually engaging landing page using HTML and CSS. Applied column layouts, section divisions, and headers/footers. Demonstrated creativity in color palettes and maintained a user-friendly design by addressing CSS issues to ensure a polished and professional outcome.

- PORTFOLIO

  Created a sleek and functional personal portfolio website using HTML and CSS. Featured a professional header, bio, skills showcase, project highlights, resume download link, and contact information. The project underscores proficiency in web development and design for effective self-presentation.

- CALCULATOR

  Designed and developed a functional calculator using HTML, CSS, and JavaScript. The project features a user-friendly interface with buttons for standard operations (addition, subtraction, multiplication, and division), and employs event listeners, if-else statements, operators, and loops for efficient user input handling and real-time calculations. This project underscores my skills in front-end development and logical problem-solving using core web technologies.
